#### Bachelor Student in Computer Engineering

2020 - 2025

AYDIN ADNAN MENDERES UNIVERSITY  
Average : 3.43 / 4.00

#### Haydar Aliyev Science High School

2016-2019

Average : 93.38 / 100.00

### LANGUAGES

Turkish - Native Language

English - B2 ( Upper Intermediate )

Azerbaijani - B1 ( Intermediate )

### ABOUT ME

Hello, my name is Batuhan. I am a third year Computer Engineering student at Aydin Adnan Menderes University. Since my childhood, I have learned the photography industry, which is my father's profession. As a result, I have a strong foundation in basic computer knowledge. I am proficient in various Adobe programs, especially Photoshop. In my academic journey, I have developed and continue to develop programs using languages such as Java, C, HTML/CSS/Js and Python. Additionally, I have more than a year of experience in Kotlin. In general, I am an entrepreneurial individual who enjoys implementing new ideas. I am currently doing research for a TUBITAK project and I am also studying Fintech Education at a university.

### PROJECTS

#### Cryptocurrency Autonomous Agent

2024

This program, developed using the Python language, aims to show users the buy-sell points for the selected cryptocurrencies. The interface was designed using the PyQt5 library and QT Designer. Several indicators and data from economic news websites were extracted and subjected to machine learning.

#### Face Tracking Camera

2023

Developed with our team using the Arduino and Python programming languages, the project utilizes the OpenCV library. The camera detects and starts tracking the face it sees. You can watch the video of the project on my website.

#### Employee Salary Calculator

2023

It is designed using Java. Data is stored in JSON file format. It is a desktop application that performs functions such as adding, deleting, updating, and searching employees' salary, name, surname, and SSN information based on shift types from the database.

#### Wordle Game

2022

It is a clone of the classic Wordle game, developed using HTML/CSS/JavaScript.

### EXPERIENCES

#### Freelancer

Since the first grade, I have been freelancing to design and assist in the development of intermediate-level C projects and websites.

### HOBBIES

Since my childhood, I used to participate in chess and basketball tournaments. We achieved success as a team in basketball. Unfortunately, I am currently unable to continue with these activities and can only focus on fitness for now.

### CERTIFICATES

- Android Mobile Application Development with Kotlin Basic Level - BTK Academy
- Version Controls: Git and GitHub - BTK Academy
- Introduction to Artificial Intelligence and Algorithms - BTK Academy
